Dicti sunt autem Nomades, ἀπὸ τοῦ νέμεσθαι, i.a pascendo, quod pastionibus præcipuè vacarent. Sunt & alij Nomades in Scythia supra Mæotim. Pli. lib. 4. c. 12.

Nomæ, f. i. νομαὶ. vlcera, quæ depascunt, vorantque serpēdo corpus, Pli. li. 23. cap. 4.

Nomen, inis, n. 3. [*Nome*, ou scheu. Germ. Ein nam. *Gal.* Nom. *Hisp.* Nombre,] à nosco, quod notitiam faciat: nam per id, quo quicquid nominamus, agnoscitur. Vel nomen dicitur, quasi notamen: aut a Græco ὄνομα, abiecto α. Proprie autem nomen dicitur, teste Nonio, proprium vocabulum singulorum, hoc est, quo singulæ res appellantur. Inde Nomino, as, quod est nomen alicui rei imponere: id autem fit dupliciter: Aut enim vniuerso generi nomen imponimus, quod grammatici nomen appellativum vocant: vt cum animal rationale hominem dicimus nominari. Aut singulis rebus peculiare nomen imponimus, quod illi cum alio non sit commune, hoc à grammaticis nomē proprium appellatur, quod sic definitur a Cicerone, Nomen est, quod vnicuique personæ attribuitur, quo quæque suo proprio, & certo vocabulo appellatur. Hoc rursus dividitur in [illegible] membra, Prænomen, Nomen, Cognomen, & Agnomen. Prænomen interdum vna, interdum duabus, interdum tribus literis notabatur, vt C. Caius, Gn. Gneus, Sex. Sextus: Fuitque nonnulla ratio prænominis: nam & Quintum ideo dixerunt, quod quinto fortassis loco natus esset. Lucium, quod initio lucis exortus. Gnæum, a corporis effigie. Nomen, quod gentis & familiæ originem declarat, quodque omnibus, qui ex eadem gente sunt, commune est, vt Cornelius, Cognomen tractum est ab aliquo corporis vitio, vel commodo, aut aliquo euentu, vt Scipio. Agnomen extrinsecus venit, & hoc tribus modis: Aut ex animo, vt Superbus, Pius: Aut ex corpore, vt, Crassus, Pulcher: Aut ex deuictis gentibus, vt Africanus, Gothicus, Asiaticus, Numantinus. Sæpe autem potius apud classicos auctores Cognomen, quam Agnomen dicitur. Cic. Scipio ille cui Africano fuit cognomen. Idē ad Attic. Teque non cognomen solum Athenis deportasse, sed humanitatem, & prudentiam intelligo. Romani plerumque tribus, vti solent nominibus, nonnulli etiam quatuor; vt, P. Cornelius Scipio Africanus: vbi Publius est prænomen. Cornelius nomen propriè dictum, Scipio cognomen, Africanus agnomen. Et nomē quidem atq. cognomē omnium eiusdem familiæ commune erat: prænomen verò tantùm singulorum. Prænomen itaque illud erat, quo fratres, aut gentiles a se mutuo distinguebantur. Quidam etiā a vestimento cognomen sortiti sunt, vt Antonius Caracalla: quidā a pecore minori, vt Porcius, Scrofa: quidam a pecore maiori, vt Equitius, Taurus; quidam a piscibus, vt Sergius Orata, Muræna. Plurimi autem cognomen inde tractum putatur, quod q̄ primus in ea familia hoc cognomine dictus est, pili vsum inuenerit. Aliqñ nomen pro decore, cognitione, & dignitate, ponitur [*Ornamento.*] Vir. 2. Aen. Auulsumq. humeris caput, & sine nomine corpus. Interdum pro generositate, [*Nobilitá.*] Idem lib. 2. Georg. Aut pomis sua nomina seruat. Interdum pro nobilitate generis, fama, [*Fama.*] Vir. 2. Aen. Et nos aliquod nomenq. decusq. gessimus. Ouid. Met. Magnum & memorabile nomen. Nomen etiam accipitur pro genere, [*Stirpe,*] vt apud Vir. Nostrumq. in nomen itumas. Nomina præterea dicuntur capita, vel (vt hodie loquimur) articuli rationis argentariæ, in quibus descripta sunt nomina debitorum, quibus pecuniæ expensæ feruntur. Ci. 3. Ver. Satis te elapsurum ot suspicione arbitrare, si quibus pecuniam credebas, iis expensum nō ferres? neq. in eas tabulas vllum nomen referres. Nonnumquam nomen accipitur pro ipso debitore. [*Debitore.*] Col. lib. 1. ca. 7. Vel optima nomina non appellando fieri mala, Alphius dixisse verissimè fertur. Sæpe etiam nomen accipitur pro debito, [*Debito.*] Cic. ad Att. li. 16. Nomina mea per Deos expedi. Item ad eundem lib. 6. Salaminios adduxit, vt totum nomē Scaptio vellent soluere. Ponitur enim nomen aliquando pro causa, [*Cagione*] Ci. de Amic. Ab amicitia Q. Pompeij meo nomine te remouerat Scipio. Nomē aliqñ transit in aduerbiū, vt Torumq. tuent. i. torunè. Ἀντὶ τοῦ χαριν. Item aduerbium in nomen: vt, apud Persium, Iam cras hesternū consumpsimus, ecce aliud cras. Nomina tamquam in aduerbium migrantia suam sæpe seruant quantitatem, vt apud Virg. 3. Eclo. Transuersa tuentibus hirquinam Transuersa, quum aduerbium sit, attamen breuis est, quia venit ex nomine, quū sciamus in a, terminata aduerbia longa esse. Nomina per diuersos casus loco aduerbiorum ponuntur: per nominatiuum, vt Fors pro Fortè, Recens pro recenter: per genitiuum, Militiæ pro in Militia: per datiuū, vt Vesperi, Ruri, Sorti: per sortem: per accusatiuum, vt Torum pro torunè, Clarum pro clare: per ablatiuum, vt Rure, Domo.

Horum opera vtebantur plerique candidati, vt sibi prensando suffragatores, nomina ciuium suggererent. Vnde laudātur Cato, quod legem seruans, quæ candidato nomenclatores adesse vetat, vt per seipsum sine nomenclatore nominatim saluaret ciues Romanos. Hi & Fartores quoque dicebantur, quod salutatorum nomina, vt ait Festus, velut infarcirent petitorum auribus. Cic. pro Mur. Monitores etiam vocat.

ↁↃ	5000	quinque millia.
ↀↀIↃↃ	10000	decem millia.
ⅬↃↃↃ	50000	quinquaginta millia.
ↀↀↀIↃↃↃ	100000	centum millia.
ⅮↃↃↃ	500000	quingenta millia.
ↀↀↀIↃↃↃↃ	1000000	decies centena millia.

Non erat autem, inquit Pli. apud veteres numerus vltra centum millia: itaq. & hodie multiplicantur hęc; vt, decies centena millia, aut sæpius dicatur. Atq. hæ notæ, si figuram considerares, exdē omnes sunt, nisi quod in quinq. primis deprehenditur dissimilitudo: nam cum scribimus CIↃ, siue IↃↃↃ, & inde quæ subsequūtur, duabus tantum vtimur notis. I, & C. hoc tamen obseruantes, vt C. post I. non tamquam auersa, sed quasi respiciens constituatur, sic vnāquamq. summā, quam volueris immensam, explicari primis quinque notis animaduertes. Hęc est prima consideratio. Sequitur altera, quod à prima nota vsq. ad eas, quas in extremo posui, alternis modo in quincuplum summa crescit, modo in duplum, quod ipsas notas, qui perseq singulas voluerit, intelliget. Priscia. autem hanc rationem tractat imperitè: primum, mille sic ait notari x. & decem millia sic CIↃ. In quo repugnat vetustatis obseruatio: triplex enim genus est, quod antiquitatem maximè testatur, lapides, libri, nummi; & cum ego in singulis non ita negligenter sim versatus, numquam tamē x. pro mille comperi, nunquam CIↃ. pro decem millibus. Sed idem labitur in sua sententia: infert enim paulo post: Decem millia, quod verisimilius est, notatum per M. circum scriptum ex vtroq. latere, & M. putat mille significare; quia nominis prima sit littera, quorum alterum concedo, vt M. mille valeat, alterum, quia cum ratione pugnat, concedere non possum, vt M. ideo mille significet, quod in verbo mille princeps occurrat litera: mihi enim dubiū nō est, quin M. inde sit deriuata, quod veteres pro quingentis hac vtebātur figura IↃ. vnde contra Prisciani sententiā, qui de origine D. nescio quid ridiculosè comminiscitur, facilē est D. negligentia simul & ignorantia describentium, dum antiquas notas elementa putant, ergo pro quingentis, vt dixi, scribebant IↃ. pro mille CIↃ. inde fluxit M. errorem creante similitudine, quod M. quandoq. ita scribitur CIↃ. vt minimum discrepare videatur à CIↃ. in antiquis aūt libris, & alias figuras pro mille vsurpatā licet animaduertere, vt ϖ & CIↃ. quas peperit minus accurata librariorū festinatio, id agentium, vt CIↃ. vno calami ductu perficerent, etiam ϖ pro mille reperias. Quæritur etiā cur L. quandoque pro I. posita reperiatur, vt in hac figura CCCCIↃↃↃ. & similibus? huius quoq. enunciationis culpam sustinet librariorum inscitia: quia cum a. latinum notam longiusculam viderent, exempli gratia sic CCCIↃↃↃ. decepti similitudine, consonantem L. putarunt, & pro CCCIↃↃↃ. scripserunt CCCLↃↃↃ. Hæc de numerorum notis, reliqua erat nonnulla, quę quia latitatē legentium placet occurrere, præterimus, hæc de re paulo plenius agetur in libris de quæstionibus per epistolam. Dry Rot, a disease in timber, which renders it unfit for use. It is occasioned by the fermentation of the sap, which is confined in the pores of the wood, and which, for want of a free circulation, corrupts and destroys the texture of the timber. Timber is most liable to this disease when it is felled in the spring, or when the sap is in motion, and when it is laid in a damp place, where the air has not a free circulation. The best method of preventing the dry rot is to fell timber in the winter, when the sap is at rest, and to lay it in a dry place, where the air has a free circulation. Timber which is liable to the dry rot, when it is first felled, is generally sound at the heart, but when it is laid in a damp place, the sap corrupts and destroys the heart of the timber, and the timber becomes hollow. The dry rot is also occasioned by the attacks of insects, which bore into the timber and destroy its texture. P. M. Prænomẽ. Romana prænomina ad triginta fuiſſe, ex Varronis ſententia tradit Valerius. Hęc autem fuiſſe videntur, Agrippa, Appius, Aulus, Cæſo, Caius, Cneus, Decimus, Hoſtus, Lucius, Mamercus, Manius, Marcus, Numerius, Opiter, Poſthumus, Proculus, Publius, Quinctus, Seruius, Sextus, Spurius, Tiberius, Titus, Tullus, Vibius, Volero, Vopiſcus. Peregrina vero prænomina fuere, Ancº, Arruns, Lar, Lucumo, Metius, Numa, Petro, Põpo, Sertor, Tallus, Turnus, Voluſius, de quorũ prænominum origine, ac ſignificatione, quoniam qui de nominibus modo ſcripſere, nihil dixerũt, nos ea ſcribemus, quæ a veteribus tradita, a nobis quãta maxima fieri potuit diligẽtia, ſunt collecta. Agrippa, Feſto auctore, vocat, qui cum labore matris ſit natus, exempli cauſſa, in pedes contra naturam, & non in caput, ideſt, ab ęgro partu. Item Nonius Marcellus, & Quinctilianus lib. 9. Appius ex Sabinorũ prænomine Actio venit, vt ait Valerius, idq; Romæ Claudiorum fuit, quorum princeps Actius Clauſus dictus eſt, de quo Liuius lib. 11. Auli, dicti, qui dijs alentibus naſcerentur, vt ait Valerius. Cęſo, qui ex vtero matris exectus eſt, quod tradunt Feſtus, Valerius, Plin. libr. 7. c. 9. Caius a gaudio patrum appellatus, vt ait Valerius. Cneos vel ab inſigni aliqua re, quaſi γνησίους, vel γίγνεσθαι, ideſt, generatione futura, dictos tradit Valerius, & Feſtus. Quinctus, Sextus, Decimus, a numero dicti ſunt, teſte Varrone, vt qui quinto, ſexto, & decimo quoq; loco eſſet natus, is demum primis temporib. Quinct. Sextus, & Decimus diceretur. Hoſtus, inquit Valerius, fuit prænomen in eo, qui peregrè apud hoſpitem natus eſt, fuitq; prænomen Lucretij Tricipitini, collegæ L. Sergii Conſulis. Macrob. Sat. li. 1. qui in Hoſtico procreatus eſſet, eum Hoſtium fuiſſe vocatum ſcribit, eſt autem mendum apud Valerium, hoſpes enim legitur, non Hoſtus, quod autem legẽdum ſit Hoſtus, ex eo intelligi poteſt, q Liuius Lucretium Tricipitinum, cuius meminit Valerius, Hoſtũ vocat, & in Conſulibus Capitolinis ſcriptum eſt, P. Lvcretivs Host. F. Macrobius etiam libr. 1. Hoſti Hoſtili mentionem facit. Lucij duplex origo traditur a Valerio; aut enim a Lucumonibus Etruſcis dictus eſt, vt Lucumo Tarquinienſis, qui ſe L. Tarquiniũ appellauit, aut is demum Lucius appellatus eſt, qui lucis initio natus eſt, quod ſcribit etiam Feſtus, & Varro. Mamercus prænomen gentis Aemiliæ fuit, de quo Plutarchus in Numa, & Aemilio ſic: Mamercus fuit Pythagoræ filius, a quo Numa põpilius Rex filiũ Mamercũ nominauit, qui auctor, & Princeps gentis Aemilię fuit. Feſtus autem prænomen Oſcum eſſe putat, quod Oſci Martẽ Mamercum appellaucrint. Manius dictus eſt, qui mane eſt ortus, aut ominis cauſa, quaſi bonus, manum enim antiqui bonum dicebant, quod tradit Varro lib. 11. de analogia, Valerius, Feſtus, Macrobius lib. 1. Sat. Zoſimus autem Græcus hiſtoriarum auctor li. 1. tradit, Manium in gentem Valeriã profectũ eſſe a quodam Valerio, qui primus ſacra Dijs Manib. fecit. Marcus dictus eſt, qui mẽſe Martio natus eſt, vt ait Valerius. De Numero ſic Feſt: Numerius prænomen nunquam antea fuiſſe in patricia familia dicitur, quã Q. F. qui vnus poſt ſex & trecentos ab Etruſcis interfectos ſuperfuit,

inductus magnitudine diuitiarũ, vxorem duxit Otacilij Maleuentani, vt tum dicebatur, filiam, ea conditione, vt qui primus natus eſſet, prænomine aui materni Numerius appellaretur. Et Valerius ita: Numero ſola patricia familia vſa eſt Fabia, iccirco quod Cęcvi. apud Cremeram flumen cæſis, qui vnus ex ea ſtirpe extiterat, ducta in matrimoniũ vxore filia Numerij Otacilij Maleuentani, ſub eo pacto, vt quem primũ filium, ſuſtuliſſet, ei Numerij prænomen imponeret, obtemperarit. Hinc mendosè apud Ciceronem li. 1. de Diu. nationc legitur ita: His adiungatur etiã ſomniũ Æneæ, quod in numerum Fabij pictoris, Græci, annalibus ſcriptum eſt, cum ſit legendũ, Quod in Numerij Fabij pictoris, fuit enim alter Fabius pictor prænomine Quinctus, qui de rebus Romanis Latinè ſcripſit, Gellio & Nonio teſtibus, qui eius ſæpe verba Latina profert, itemq; Cicerone de legibus li. 1. qui eum inter hiſtoricos Latinos numerat, at qui Græcè eiſdem de rebus ſcripſit, is videtur fuiſſe Numerius nominatus, quem tamen li. 1. Dionyſius Quinctum nominat. Hac ratione in oratione pro Cluentio, Numerios Aurios legimus, & lib. 3. de Oratore, Numeriũ Furium, & li. 2. de Diu. Numerium Suffecium, & apud Pedianum, Numeriũ Quinctum. Opiter dictus, cuius pater auo viuo mortuus eſt, quaſi qui poſt obitũ patris genitus ſit, aut qui ob patrem auum habebat: quod prænomen Virginio Tricoſto Cõſuli fuit. Valerius, & Feſtus. Poſthumus, qui poſt humatum patrem eſt natus, Varro li. 2. de analogia, & Plutarch. in Coriolano, vt Poſthumus Cominius, & Poſthumus Aebutius, de quibus Valerius. Proculus, q̃ natus ſit patre peregrinante patria procul, vt ait Plutarchus in Coriolano. Valerius aũt, qui patre ſene natus ſit, quaſi procul ętate progreſſo, cum Proculũ eſſe vocatũ dicit. Publios, ait Valerius, qui prius pupilli facti erant, quã prænomina haberẽt, alijs ominis cauſſa a pube. Seruius is primum dictus eſt, quem ſeruiẽs mulier peperiſſet, vt de Ser. Tullio Rege ſcribit Dió, at Valerius qui mortua matre, in vtero ſeruatus eſt. Spurius dictus, qui ſine patre eſſet, antiqui. n. ijſdem litteris S. P. Spuriũ, & ſine patre ſcripſerũt, q̃ a Plutarcho in quæſtionibus, & Valerio traditũ eſt. Tiberij, ait Valerius, dicti, qui ad Tiberim naſcerẽtur. De Tito, controuerſia eſt. Valerius a Sabino quodam, nomine Tito, manaſſe ait: Feſtus a titulo: titulos autẽ milites fuiſſe, quod patriã tuerẽtur, quaſi tutulos. Tullus ominis cauſa dictus eſt, quaſi tollendus, o littera in u verſa, quod a Valerio proditum. Volero, inquit Valerius, in prænomen abijt, quia volentib. naſci liberis parẽtibus videbatur, quo vſus eſt Publitius Philo, qui nominatur in anno CCCLII. Capitolino. Vibium prænomen eſſe indicat annus CCC. Capitol. vbi eſt ita: Sextvs Q. F. Vibi. N. Capitolinvs. Itemque Liuius libr. 26. Vopiſcus dictus, qui ex duobus conceptis vno abortu excluſo, ad partũ legitimum deduceretur, quo prænomine precipuè Iulia gẽs vſa eſt: Valerius Feſtus, Plutarchus in Coriolano, Pli. lib. 6. c. 9. Hactenus de Romanorum prænominum vi ac ſignificatione, nunc de peregrinis, quorũ eſt ratio & ſignificatio. Ancum ſcribit Varro a Sabinis ortum, Valerius aũt tradit eũ Ancum eſſe appellatum, qui vitioſum habuit cubitum, qui ἄγκων Græcè dicitur, cui etiam Feſtus aſſentitur. Ancus enim, inquit ille, vocatur, qui aduncum habet brachium, ita vt regi non poſſit; hinc Ancus Martius Rex, & Ancus Publicius Imperator Lanuuinus cõtra Hoſtilium Regem, Dionyſio auctore, Aruntem & Lucumonẽ Etruſca prænomina fuiſſe, ſcribit Dion. itaq. Aruntem Tarquiniũ ſuperbi regis filium, & Aruntem Tolumnium, Porſenæ filiũ, legimus. Voluſius Sabinũ fuit, eoque vſus eſt pater P. Valerij Publicolæ, Liuio, & Capitolinis lapidibus auctoribus, quamquam Græci οὐ ἄλτωρ. vocant. Lartis prænomen, vt tradit Valerius, a laterib. ſũptum eſt. Tuſcum autem ante creditum eſt eſſe: fuitque Conſulis Herminij. Idem fere Cariſius & Priſcianus lib. 5. Lar, ſi familiaris eſt, facit laris, ſi Tolũnij Porſenæ, Lartis & Seruius 16. Aeneidos: Lar Tolumnius a Coſſo occiſus a loco dictus eſt, flectitur aũt Lar Lartis, & Liuius 4. Daturos, quod Lar Tolumnius dediſſet, & Cic. Philippica nona, Lar Tolumnius Veiẽtium Rex. De Larte Porſena ita Dionyſius lib. 5. Βασιλεύς ἦν πλουσιωτάτων λάρος ἔνομα πορσίνας ὑπὲρ Τιβέριν. Quod autem hoc prænomẽ Hermonij Cõſulis fuerit, vt ait Valerius, id etiã ex Dionyſij lib. 9. cognoſcitur, a quo ita anno CCCIV. Conſul ſcribitur, λάρος ἑρμώνιος. & a Diodoro λαρίνος ἑρμώνιος. Ex his autem intelligi poteſt, quàm verè ſcripſerint quidam in libro de nominibus, ita poſteaquam in vrbem migrarunt Sabini, duplicari nomina cęperunt, vt Numa Pompilius, Ser. Tullius, Lartes Porſena, quamuis hoc nomen Etruſcum fuerit, in quo prænomine Larte ſciendum, eo veluti prænomine vſos veteres Seruius interpres Virgilianus ab oppido dictum putat: Itidem Plutarchus in Publicola exiſtimat, qui tamen λαύρτης. ſcribit, ſed male. Hęc illi, quã antẽ vere, ipſi viderint, neque. n. Lartes Porſena duobus tantũ nominibus vſus eſt, cum ex Tolumnia gente fuerit, Seruio, quem ante nominaui, auctore, nec Lartes in recto caſu dicitur, ſed Lar, q̃ ſuperioribus teſtimonijs comprobatum eſt, nec Seruius Lartem ab oppido dictum ait, ſed a loco, nec item Plutarchus vllo ĩ libro, nedum in Publicola, ab oppido dictum ſcripſit, neque item eſt apud Plutarchum λαύρτης, ſed λάρις, quanq; mendosè, ipquit enim λαυρίους κλάρας, τροβέαν. cum ſit legendum ex

PRAETEXTA, f. 1. toga. περιπόρφυρος. genus veſtimēti oblongū, ac talare, quod ſupra tunicas magiſtratus ſumebāt, ita dicta, quod ei purpura prætexebatur. Hæc vnà cum bulla in vſum puerorū nobiliū vſurpabatur. Vnde prætextati dicebantur, qui nondū decē & ſeptē annos præterierant, a prætextata, quā induebant; qua depoſita, accipiebant togā virilē, cum ad annum decimum ſeptimū peruenissent, tamquā nō pueriliter, ſed viriliter, vita eſſet peragēda. Ci. A patre ita erā deductus ad Scæuolā, ſumpta virili toga, vt quo ad poſſem, & liceret, a ſenis latere numquā diſcederē. Ideo āt ingenuis pueris attributum exiſtimant togā prætextā, vt ex purpurę rubore, ingenui pudoris admonerentur. Macr. li. 1. Sat. Ab hoc veſtimenti genere olim Papirius cognominatus eſt prętextatus, ob tacendi, loquendiq; in prætexta ętate prudentiam. Id poſtea cognomen in oēm eius familiā translatum fuit. Erat & prætexta geſtamen magiſtratuum, & regū. Hac Tullus Hoſtilius primus vſus eſt (vt inquit Plinius) qui debellatis Hetruſcis ſellam curulem, lictores, & togam pictam, atq; prętextam (quæ inſignia magiſtratuum Hetruſcorum erant) Romam tranſtulit. Sed poſtea Tarquinius Demarati filius, cum de Sabinis egiſſet triumphū, qm̄ in eo bello filius eius annos quattuordecim natus, hoſtem manu percuſſerat, & pro concione illum laudauit, & prætexta, ac bulla aurea donauit, inſigniens puerum ſupra annorum ſortēm, prēmijs virilitatis, & honoris: prętextę igitur ac bullę geſtandę mos a priſci Tarquinij filio deductus eſt. Sunt tñ, qui tradūt, eumdem priſcū, cum ritum ciuitatis ordinaret, inſtituiſſe, vt patritiorum filij bulla aurea vterentur, & togam, quæ purpura prętexitur, ijs tantum, quorum patres curulem magiſtratum geſſiſſent, cæteris prætextā tantum indulſiſſe, vſque ad eos, quorum parentes ſtipendia iuſta meruiſſent. Fuit & in vſu prętexta bulla, qua nulli alij licebat vti, niſi ei qui funus faciebat. Dicimus autem Prætextus, a, um, adiecti uè, vt prætexta toga, prætextæ actiones: vt ſubſtantiuè hęc Prætexta, huius prætextæ. Prætextę fabulæ, ſeu comędiæ, in quibus Reges Romani, vel duces inducebantur, perſonarum dignitate penè tragœdijs ſimiles. Hora. in Art. Vel qui prętextas, vel qui docuere togatas. Dictæ prętextæ, quod principum magiſtratuumve perſonę in ijs inducerentur, quę prætextis vti ſolent.

P.M. Prætexta quatuor hominum genera vtebantur; pueri ad vſque Tirocinij diem, hoc eſt, ad annum ætatis 17. magiſtratus oēs vrbani, quod vtrumq; nemo, vt opinor, paulo humanior ignorat. Prętęterea, quod obſeruatum non ita vulgo credimus, magiſtri collegiorum, dum ludos compitalitios faciebant, & Senatores oēs cum Deorum feſtos celebrabāt dies. De magiſtris collegiorum docuit me locus in oratione in Piſonē, quo in loco ſunt hæc: Q. Metellus deſignatus Conſul, cum quidam Tribunus pleb. ſuo auxilio magiſtros ludorum ludos facere iuſſiſſet, priuatos fieri vetuit, vt, cū in Calendas Ian. compitaliciorum dies incidiſſent, Sex. Clodiū, qui numquam antea prætextatus fuiſſet, ludos facere, & prætextatum volitare paſſus eſt. quibus verbis Pedianus hęc ſubiungit: Solebāt magiſtri collegiorum ludos facere, faciebant cōpitalicios prætextati. Erat āt ſatis turpe mendum in ijs verbis, Magiſtros ludorum ludos facere, nam eſt in oībus, qui ad hanc diem impreſſi leguntur libris, Magnos ludos facere, cum loquatur Cicero non de magnis ludis, ſed de cōpitalicijs; vt omittam duo argumenta, vnū, quod illud facere iuſſiſſet, aliquid oīno deſiderabat: quem-n. Tribunus ille ludos facere iuſſiſſet? alterum quod Pedianus ita loquitur, vt ſignificet magiſtrorum in oratione fieri mentionē, quā facilè autem ex magiſtros, fieri potuerit, magnos, literarum declarat ſimilitudo, prętertim ſi, magiſtros paucioribus litteris apice ſuperimpoſito ſcribatur. De Senatoribus autem ex ijs verbis, quæ ſunt in oratione 11. in Antonium, conieci: Neſcis, heri quartum in Circo diem ludorum Romanorum fuiſſe? te autem ipſum ad populum tuliſſe, vt quintus prętęrea dies Cęſari tribueretur? cur non ſumus prętextati? cur honorem Cęſaris, tua lege datum, deſeri patimur? Ex commentario noſtro in oratione pro Seſtio.

PRAETEXTATVM ſermonem (inquit Feſtus) veteres appellarūt ab eo, quod prætextatis nefas ſit obſcæno verbo vti, vel (vt quidā aiunt) quod nubentibus, depoſitis prætextis, a multitudine puerorū obſcœna acclamarentur, ideoq; prætextatum ſermonē appellabāt, qui nihil obſcœnitatis haberet. Hęc ille. Contra hanc tamen Feſti

opinionem, Suet. Gel. & Macr. prætextatum ſermonem acceperunt pro eo, qui apertè obſcœnam rem ſignificat, [*Laſciuo, nergognoſo.*] Suet. in Veſp. Dictus prętor (ut Liuius innuit) a præeſſendo: vt Varro, à præeundo, quaſi prętor, quod prędiret iure, & exercitu. Idem Liu. li. 5. ſcribit, primum prætorem ex patribus, qui ius in vrbe diceret, creatum fuiſſe, penes quem magiſtratum omnis publici priuatique iuris erat poteſtas, vt & nouum ius condere, & vetera abrogare facultas eſſet, idque ob magiſtratus honorem, ius honorarium appellatum eſt, cum tamen regia illi eſſent inſignia, vt apparatu conſulibus pene par videretur creatus, cum conſules auocarentur bellis finitimis, nec eſſet qui in ciuitate ius diceret.

P.M. Prætor de capitalibus criminibus quærebat, nō de omnibus tamen, ſed tantum de maieſtate, de ui, de repetundis, de crimine inter ſicarios, de ambitu, de veneficio, de inceſtu vero, & perduellione populi. Prętores autem, quę cuiuſq; futura eſſet quęſtio, ante ſortiebantur, ut deinde ſingulis de criminibus ſinguli, prout ſors tuliſſet, cum conſilio quærerent. Etſi de crimine inter ſicarios, cū in iudicium qnque ita multi uocarentur, vt prætor vnus minimè ſufficeret, non vnus, ſed duo prætores cognoſcebant, quod in oratione pro Cluentio animaduertimus. Idemque eamdem ob cauſſem in alijs criminibus interdum eſſe factum licet exiſtimare, nō numquàm etiam diem dicente aliquo Tribuno plebis, qui cogendi ad iudicium populi ius haberet, non Prętor, ſed populus ipſe de maieſtate quæſtionem exercebat: itaque Cn. Domitius Tribunus plebis, is qui cum C. Caſſio poſtea Conſul fuit, accuſauit M. Silanum, quod iuſſu populi bellum cum Cimbris Conſul geſſiſſet, cum in eo bello graues ob eam cauſſam calamitates acceptas eſſe diceret, qua de re ſuffragium tribus tulerunt. Quod autem dixi, Prætores de criminibus quæſijſſe, vnum excipio prætorem Vrbis, qui nullo de crimine publico qnærebat, itaq; nec quęſitor dicebatur, tantum ciuilibus cōtrouerſijs ad eum delatis ius dicebat, hoc eſt, iudices & iudicij formulam, quam ſequerētur dabat. Nec is prætor ipſe iudicare ſolitus erat, ſed cum iudices ab ipſo dati, de controuerſia cognouiſſent, ac iudicaſſent, exequebatur. Ideo in oībus ferme edictis prętorum legitur; Iudicē dabo. In quo poſteriores lapſi ſunt. Eſt igitur aliud ius dicere, aliud iudicare, contra quā qui veterum Iuriſconſultorum libros ignorant, opinantur: &, quemadmodum ciuilibus in rebus prætor cognoſcit, neque iudicat, ſed ius dicit, ſic qui ab ipſo iudices dati ſunt, non ius dicunt, ſed cognoſcunt, ac iudicant: hinc recuperatores, hinc centumuiri, hinc arbitri, quos prætor dabat, vt iudicarent. Atque hoc & Cic. in epiſt. ad Quint. Frat. Prętor, inquit, ſolet iudicare, deberi? Quędam tamen erant, in quibus non modo non iudicabat, verum nec ius dicebat Prętor vrb. ſed omiſſa iuriſdictione, imperio Prætorio exequebatur, vt cum bonorum poſſeſſionem ſecundum tabulas, aut contra tabulas dabat: item, cum reſtituebat in integrum, & huius generis nonnulla. Porro, cuius Prętoris erat iuriſdictio, eius non erat quęſtio publica: neque cuius quæſtio publica, eius iuriſdictio: vnus tamen de toto prętorum collegio, qui erant omnes octo, & iuris dicendi, & quærendi poteſtatem habebat, is, qui Prætor inter peregrinos vocabatur, nam ius inter peregrinos ab eo dictum, ſatis conſtat; quæſitum ſociorum, hoc eſt, peregrinorum

P. M. Prouincia. Exponemus, quot omnino in ditione popul. Rom. p uincię fuerint, & a quibus, quove anno captæ, tum quæ Consulares, quæq; Prętorie. Quo anno M. Cicero Ciliciam pro Consule administrauit, qui fuit ab Vrbe cōdita DCCII. M. Marcello, Seruio Sulpicio Cosc. prouincię xv. fuerūt in ditione populi Rom. Sardinia, Corsica, Sicilia, duæ Hispaniæ, citerior, viterior, Asia, Aetolia, Macedonia, Illyrium a Dalmatia, Africa, Achaia, Gallię duę, Cisalpina, Trāsalpina, Cilicia, Bithynia, Pontus, Creta, Syria, Cyprus: q bus ex omnibus prouincijs vectigal capiebat annuum Respu. vt à Plutracho traditum est, octuagies quinque decies centena millia. Sardiniam cepit inter primum, & secundum punicum bellū, Consul T. Manlius Torquatus, de qua trimphauit, enq; prima anno vrbis DXVIII prouincia populi Rom. facta est, missis ad eā componendam x. legatis; quod in faciendis prouincijs seruatum est. Corsicam vicit, & prouinciam fecit C. Papirius Maso. Consul, & à Senatus triumpho non impetrato, ipse de sua sententia in mōte Albano primus trimphauit, anno DXXII. & hanc vna cum Sardinia, semper vnus rexit magistratus Romanus, Siciliam primus vicit, magnaq; ex parte prouinciam fecit Q. Catulus, Primo Punico bello post aliquot annos, captis Syracusis; vniuersam in prouincię formam redegit M. Marcellus, bello Punico secundo, aut certè, q ei successit, M. Læuinus, nā de Marcello Velleius tradit. Debellata vero in Sicilia Læuino potius Prætore, quàm à Marcello Consule & Cicero in Verre, & Liuius significant. Marcellus quidem, secutus exemplum Papirij Masonis, in Albano monte triumphum egit, Vrbemque ouans est ingressus. Hispaniæ tum à Scipione Africano maiore, secundo Punico bello, tum aliquot post annis M. Catonis Censorij virtute, multis victorijs domitæ, & in eas magistratus Romani modo pro Cōsulibus, modo pro Prætoribus fuerunt; variæ tamen possessæ, & vt ait Velleius, sæpe partib. amissę, certa ac stabilis esse populi Rom. possessio stipendiumque pendere non prius, quàm Augusto Principe cœperunt. Asiam cis Taurum motem bello Antiocheno L. Aquilius Consul redegit; qui & de Aristonico triumphauit, anno DCXXIIII. Aetoliā M. Fuluius nobilior fubegit. Bellum gerere cepit Consul, proconsul confecit, & triumphauit biennio post, anno vrbis DLXVI. Macedoniam xl. diebus deuicit Cōsul iterū L. Illyriā Senatus de more misit, Macedonas omnes liberos esse iussit, & vt suis legibus viuerēt, suas vrbes, & agros haberent, magistratus annuos crearent, permisit: veteris etiam stipendij, quod Regibus pependerant, dimidia parte leuauit; anno proximo de perse Rege inter captiuos Romā ducto, triumphauit, prouinciam vero Macedoniam fecit ann. vrbis DCVII Q. Metellus, is, qui ex ea pro prętore triumphauit, & Macedonici cognomen est adeptus. Hanc prouinciam p stea cum Achaia coniunxit, equè duab. vnā fecit, rogatione perlata, P. Clodius Tribunus pleb. & vtramq; L. Pisoni, quasi præmium, quod in Cicerone eijciendo consensisset, dedit administrandam Illyrium, & Dalmatiam eodē anno, quo Macedoniam paulus, L. Anicius prætor debellauit, & vnam prouinciam fecit, triumphauitque post paulum aliquot diebus Rege Illyriorum Gentio, cum fratre, coniuge, & liberis ante currum ducto. Carthaginem & Numantiam, illam Africæ, hāc Achaiæ caput, exciderunt eodem anno, & triumpharunt, Scipio Aemilianus, & L. Mummius; tuliq. inde Scipio cognomen Africani, Mummius Achaici, factæ sunt prouinciæ duæ Africa, & Achaia. Africam autem intelligo regionem vniuersam, quam Carthaginenses possederant; nam Numidia, & ipsa pars Africæ, Massinissæ regnum fuit, Syphace superato, paruitq. Regibus, & à C. Cæsare demum, post Scipionem, & Iubam Mauritaniæ Regem deuictos, in formam prouincię redacta. Mauritaniam vero, & ipsam in Africa, multis post annis Caligula Imperator in duas prouincias diuisit. Galliam Cisalpinam puto prouinciam esse factam eo tempore, cum M. Marcellus is, qui Consul quinquies fuit, primusq; Anibalem acie vicit, Virdumarum, Gallorum Regem singulari certamine occidit, deque Gallis Insubrib. triumphauit, anno DXXVI. patet. n. prouinciam esse factam, quia coloniæ plures annis sequentib. co deductę. Item, vt Senatores certis de causis a Censoribus ordine moueantur, vt Bithynicis ciuitatibus adscribere sibi, quos vellent, ciues liceret, dum ne ciuitatis essent alienæ, sed harum quinq; ciuitatum, quæ essent in Bithynia, atque hæc à Pompeio sunt ad exemplum Romanæ Ciuitatis instituta. Cretam debellauit Q. Metellus Pro consul, & triumphauit anno DCXCI. Creticusque postea nominatus. Syria, Pompeij magni singulari virtute vltimo bello Mithridatico victa, leges accepit, prouinciarumque populi Rom. numerum auxit, triumphauit ex ea pompeius Proconsul; item ex Asia, Ponto, Armenia, Paphlagonia, Cappadocia, Cilicia, Scythis, Iudæis, Albanis, Iberia, Creta, Bastemis; præterea de Regibus Mithridate & Tigrane, anno DCXCII. Cyprus vltima, stante Respu. in prouincię formam redacta, misso in eam M. Catone Quæstore, cum iure Prætorio, Lege P. Clodij Tribuni ple. Pisone, & Gabinio Cos. an. DCXCV. Sed primum ea simul cum cilicia tamquā vna prouincia S. C. tradita est P. Lentulo Proconsuli, quod illa verba, Ciceronis in epistola ad Lentulum significant: Te posse prospicere, qui Ciliciam, Cyprumque teneas, quid efficere, & quid conferre, qui Ciliciam, Cyprumque teneas, quid efficere, & quid consequi possit; postea Quæstores in eā missi, quod ab eodem Cicerone didicimus, qui ad C. Sextilium Rufum in quadam epistola ita scribit, Tuę laudi conducere arbitror, cum primus in ea insulam Quæstor veneris, ea instruere, quę sequantur alij. Tertia pars superest, quæ prouinciæ Consulares, queve prętorię dicerentur. Ne quis errret, neutrum perpetuum fuit, non enim hęc, vel illa prouincia semper aut Consularis aut Prętoria, sed ita nomen mutabat, vt variè, modo a consularib. modo a prætorijs administrabatur, quā potestatē Senatus habebat, vt quos vellet, in quas vellet, mitteret, administratione annua: quod lege Sempronia C. Gracchi Tribuni pleb. sancitum erat. Cęsari tamen Gallię in quinquennium, contra legem Gracchi, & lege Vatinia Tribunicia, & S. Consul. mandata sunt, posteaque in alterum quinquennium lege Trebonia, itē Tribunicia Pompeio Magno, & Crasso, ij. Cos. confirmatæ, qua de re sic ad Lentulum Cicero. Stipendium Cæsari decretum, & ne lege Sempronia succederetur, facilè perfectum est. Decerni autem solitas lege Grachi, non a populo, sed a Senatu prouincias, idem in oratione p domo in P. Clodium inuehens, planè demōstrat: In ne vero, inquit, tu prouincias Consulares, quia C. Gracchus, qui vnus maximè popularis fuit, non modo non abstulit a Senatu, sed etiam vt necesse esset, quotannis constitui per Senatum, lege sanxit, eas lege Sempronia per Senatum decreta, rescidisti, extraordinem sine sorte nominatim dedisti, non Consulibus, sed reipubl. pestibus. Erat igitur eadem prouincia, ex voluntate Senatu, modo Consularis, modo Prætoria; itaque Macedoniam (vt hæc exempli causa nominetur,) Cn. Dolabella, C. Curio, M. Lucillus, L. Torquatus, C. Antonius omnes Consulares administrarunt; tum Cn. Octauius Prætorius, pater Augusti naturalis, rursus Consularis, L. Piso, & Pisone reuocato, Q. Ancharius Prætorius, idemq; patet in certis. Quo autem anno S. C. illud Cœlius in epistola sua ad Ciceronē misit, in quo S. C. hæc sunt: Senatui placere in Ciliciam, prouincia inque octo reliquas Prætorias mitti; regebantur octo prouinciæ, quæ in eo S. C. Prætoriæ vocantur, a magistratibus octo prætorijs, Cypro excepta, quam Quæstor, vt proxime ostendi, cum iure, vt opinor, Prætorio, administrabat, quia, lege Clodia, missum esse in eam M. Catonem, cū iure Prætorio, adiecto etiam Quæstore, Velleius prodidit, propterea Cyprum inter prætorias esse memoratam, facilè credo, reliquæ septem fuere, Sicilia. Sardinia, Asia, Macedonia, Bithynia, Creta, Africa; & cum Sardinia Corsicam simul fuisse, cum Bithynia Pontum, paulo ante dictum est. Sed quæretur fortasse, quot fuerint, & quæ fuerint, & a quibus administratæ eo anno prouinciæ Consulares. Septem fuerunt hæ, Duæ Galliæ, Illyricum & Dalmatia, quas vnus D. Cæsar tres regebat. Duæ Hispaniæ quas Cn. Pompeius per legatos absēs administrabat: Syria cui M. Bibulus, Cilicia, cui M. Cicero præerat, ita fuerunt hoc anno xv. p uincia; Consulares vij. Prætoriæ vij. & in vnam Consularē Cilicia in Prætorias autem omnes eo S. C. successores mitti placete, decretum est. Neque vero mitetur quisquam, si Aetoliam, Greciam, Achaiam, Thessaliam, Bœotiam. Pamphiliam, Phrygiam, Lycaoniā Lydiam, Ioniam, Cariam, Mysiam, Gallogręciam, siue Galatiam Pisidiam, Lyciam, Cappadociam, Armeniam, non nominauerim; nam Aetolia Græciæ pars fuit; Græcia vero, cū Achaia, Thessalia Bœotia, ad iurisdictionem Macedoniæ pertinuit: omnesq. simul ab vno regebantur. Id seruatum est post Consulatum Pisonis, & Gabinij: nam eo anno legem tulit P. Clodius, vt omnes illę prouincię ab eo, qui Macedonię pręesset, regerentur, non enim tulit, vt a Pr-

P.M. Quæstor distinguendus est à Prętore,iudicum .n. quæstionis duo video fuisse genera,vnum eorum,qui cū Prętores essent,quęstionis ēt iudices appellabantur; alterum eorum, qui cum prętores non essent, capitali tñ de crimine quærebant: de iudice quæstionis Prætore,patet ex oratione pro Cluentio, in qua ita scriptū est;Iubet lex iudicem quęstionis,hoc est,Q.Voconium,eosq; qui illi iudices obuenerint,quęrere de veneno.Voconium aūt Prætorē fuisse duobus argumentis conijcio; primum, quod in eo loco paulo ante Ci.dixit;Quid sibi illi scribæ?quid lictores? quid cæteri,quos apparere huic quæstioni video, volunt? lictores .n. qui magistratum non gererent, non habebant, iudicem aūt quęstionis magistratus nomen fuisse, certè nemo dixerit.Alterum argumentum est, quod ibidem Cic. subiungit de aliis Prætoribus * ē vnoquoq; quæstionem exercente.Hæc,inquit,quæstio sola ita gubernatur; quid M.Prętorij, & C. Flaminij inter sicarios:quid C. Orchinij peculatus:quid mea de pecunijs repetundis; quid C. Aquilij de ambitu;quid reliquæ quæstiones? Quib. ex verbis Prętorem fuisse Voconium, qui iudex quęstionis appellatur, quis non intelligit?nam etsi Prætores non nominat,satis tñ constat de Prætoribus intelligi,a quibus.n.& tot quæstiones,nisi a Prętoribus,& tam graues exercerentur,inter sicarios,de repetundis, de ambitu, peculatus? Præterea si quæsisse de repetundis in eo loco Cic.dicit, quod ab eo factum in Prætura,Valerius & Plutarchus confirmat vt omittam, quod Quęstorem Aquilium nominat, cuius annum fuisse legitimum, eundem, qui Ciceroni ad petendum Consulatum; prima docet ad Att.epist.ex quo, fuisse collegas in Prætura licet existimare, quod etiam lib. primo de Officijs manifestum est,collegam enim suum Ci appellat. Rursus iudicem quæstionis Iunium,qui Prętor non erat,quęsisse de veneno in Oppianici causa,docet Pedianus his verbis: Iunius quæsitor fuit in Cluētij causa, Verre Prætore,in qua Oppianicus damnatus est: & alio loco Damnato Oppianico,res inuidia fuit, quod pecunia reus videretur oppressus,& princeps illorum iudicum damnatus est C. Iunius,quod diceretur alios suppositisse qui reum damnarent, non eos, quos Prætor Verres fuerat subsortitus, neque hic eum Pedianus neque supra Prętorem nominauit, Cicero autem in oratione pro Cluentio:Condemnatus est inquit,C.Iunius, qui ea quæstioni prefuerat.Adde etiam illud,si placet,tum est condemnatus, cum esset iudex quęstionis.Et alio loco:Quintius Tribunus pleb. conuicium C.Iunio iudici quęstionis maximum fecit, non fuisse autem Prætorem,apertè,sic,inquam,apertè vt clarius esse nihil possit; idem demonstrat in eadem his verbis; In hanc flammam recentem C.Iunium,qui illi quęstioni præfuerat,iniectum esse memini, & illum hominem Aedilicium iam Prętorem opinionibus hominum constitutum,de ciuitate esse sublatum, ecce non Prætorium,

Vn thresorier.* H. *Contador mayor.*] ταμίας, ταμίας. præpositus pecunię publicę, qui curam ærarij habet Cice. lib. 2. de Inuent. Rhodij quosdam legarunt Athenas, legatis Quæstores sumptū, quē oportebat dari, non dederunt. Quęstorū aūt officium primū bellorum cā inuentum est: mittebantur. n. cū Consulibus, & Prætoribus in militiā ad administrandā rem pecuniariā, & prædā ac manubias in rationes publicas referendas. Cic. de Sen. Non me ijs esse viribus quibus aut miles Punico bello, aut quæstor in eodē bello fuerim. Huiusmodi quæstores hodie Thesaurarios bellicos vocamus. Quęstores vi bani, inquit Budæus, ęrariū curabant, eius pecunias expensas & acceptas referre in tabulas publicas cōsuerant. Pro ijs nunc Præfectus ratiociniorū habemus, quos Magistros cōputorū vocamus. Pecunia publica Romæ in templo Saturni cōdita erat, quod ærarium dicebatur, quā tribuni ærarij, cum opus erat, promebāt. quæstores ærarios hodie vocare possumus eos, quos malefactarum, & vt vulgus loquitur, Emendarum receptores vocant. Quæstor item dicitur qui præest iudicijs exercendis, & maleficijs puniendis, ὁ ἀνακρίνων. quem maleficiorum iudicem appellare solemus, [*Giudice del maleficio*,] Vsitatiùs tamen hunc Quęstorem vocamus. Cic. pro Fon. Quid mihi opus est sapiente iudice, quid æquo quæsitore? Idem in Varin. Quæro ex te, Vatini, num quis reus in tribunal siu quæsitoris ascenderit, eumque vi de turbarit, subsellia dissiparit, vrnas deleuerit. Ad hanc autem similitudinem inquit Asc. Virg. lib. 6. Minoem iudicem apud inferos, tanquam prętor sit rerum capitalium, Quæsitorem appellat. Quæstor autem dictus a quærendo, quod componeret publicas pecunias, & maleficia.

P. M. Quæstor distinguendus est à Prętore, iudicum. n. quæstionis duo video fuisse genera, vnum eorum, qui cū Prętores essent, quęstionis ēt iudices appellabantur; alterum eorum, qui cum prętores non essent, capitali tñ de crimine quærebant: de iudice quæstionis Prætore, patet ex oratione pro Cluentio, in qua ita scriptū est; Iubet lex iudicem quęstionis, hoc est, Q. Voconium, eosq; qui illi iudices obuenerint, quęrere de veneno. Voconium aūt Prætorē fuisse duobus argumentis conijcio; primum, quod in eo loco paulo ante Ci. dixit; Quid sibi illi scribæ? quid lictores? quid cæteri, quos apparere huic quæstioni video, volunt? lictores. n. qui magistratum non gererent, non habebant, iudicem aūt quęstionis magistratus nomen fuisse, certè nemo dixerit. Alterum argumentum est, quod ibidem Cic. subiungit de aliis Prætoribus ꝺ ā vnoquoq; quæstionem exercente. Hæc, inquit, quæstio sola ita gubernatur; quid M. Prętorij, & C. Flaminij inter sicarios: quid C. Orchinij peculatus: quid mea de pecunijs repetundis; quid C. Aquilij de ambitu; quid reliquæ quæstiones? Quib. ex verbis Prętorem fuisse Voconium, qui iudex quęstionis appellatur, quis non intelligit? nam etsi Prætores non nominat, satis tñ constat de Prætoribus intelligi, a quibus. n. & tot quæstiones, nisi a Prętoribus, & tam graues exercerentur, inter sicarios, de repetundis, de ambitu, peculatus? Præterea si quæsisse de repetundis in eo loco Cic. dicit, quod ab eo factum in Prætura, Valerius & Plutarchus confirmat; vt omittam, quod Quęstorem Aquilium nominat, cuius annum fuisse legitimum, eundem, qui Ciceroni ad petendum Consulatum; prima docet ad Att. epist. ex quo, fuisse collegas in Prætura licet existimare, quod etiam lib. primo de Officijs manifestum est, collegam enim suum Ci appellat. Rursus iudicem quæstionis Iunium, qui Prętor non erat, quęsisse de veneno in Oppianici causa, docet Pedianus his verbis: Iunius quæsitor fuit in Cluētij causa, Verre Prætore, in qua Oppianicus damnatus est: & alio loco Damnato Oppianico, res in inuidia fuit, quod pecunia reus videretur oppressus, & princeps illorum iudicum damnatus est C. Iunius, quod diceretur alios supposuisse qui reum damnarent, non eos, quos Prætor Verres fuerat subsortitus, neque hic eum Pedianus neque supra Prętorem nominauit, Cicero autem in oratione pro Cluentio: Condemnatus est inquit, C. Iunius, qui ei quæstioni prefuerat. Adde etiam illud, si placet, tum est condemnatus, cum esset iudex quęstioni. Et alio loco: Quintius Tribunus pleb. conuicium C. Iunio iudici quęstionis maximum fecit, non fuisse autem Prætorem, aperte, sic, inquam, apertè vt clarius esse nihil possit; idem demonstrat in eadem his verbis; In hanc flammam recentem C. Iunium, qui illi quęstioni præfuerat, iniectum esse memini, & illum hominem Aedilicium iam Prętorem opinionibus hominum constitutum, de ciuitate esse sublatum, ecce non Prætorium,

storium,sed Prętorem opinionibus hominum constitutum dicit; quod eũ Prætorem sine dubio futurũ homines opinarentur; Prætor autem si fuisset, non eum Aedilicium, sed Prætorium vocasset laudabant,n. veteres, ubi ornare aliquem vellent,ab eo magistratu,quem postremum gessisset. Itaque homo Aedilicius,Prætorius Consularis,dicebant, Preterea,cum Prætores in leges non iurauerint,neq, sententias tulerint, quod & Cic,& Pedianus docent.à Iunio autem iudice quæstionis ideo multa petita sunt, vt in oratione pro Cluentio legimus,quia in legem non iurasset, erat.n illi iurandum ideo,quod iudicibus lege oino se esse in ferenda sentẽtia seruaturum, satis constat, Iunium,cum de Oppianico qnęsiuit Prętorem non fuisse. Quod si quis dixerit, non tam Iunium iudicem quęstionis,quàm Verrẽ Prętorem,in illa Oppianici causſa quęsijsse,quia Pedianus ita dicat, Iunius quęsitor fuit in Cluentij causſa, Verre prętore,& quia idẽ alio loco sortitionẽ,& subsortitionem à Verre Prętore factã tradiderit;huic ita respõderi poterit;sortitionem, & subsortitionem, non illius modo iudicij, verum etiã aliorum ideo pertinuisse ad C. Verrẽ,quia prætor Vrb.erat,quod ipse declarat Ci.in Orat.pro Cluẽtio.Prętor ãt Vrbanus de criminib. quærebat;quare nec vnquam quæsitor dicebatur, sed ius tantum dicebat,hoc est, iudices,& formam iudicii dabat,idemq; iudices quib.alij prætores ad cognoscẽdas capitales causſas vterentur,sortiebatur,& subsortiebatur,q̃ ex Pediano,& ex ipso ẽt Ci.satis liquet. Accedit locus ex lib.1.accusationis in Verrẽ, quo in loco Q. Curtiũ iudicem quęstionis appellat Cicero, in causſa Verris Repetundarũ: de qua Prætor M.Acilius Glabrio cognoscebat, eumque Curtium,ait Pedianus,à Cicerone esse reiectum. Illud addo, cum iã docuerim,iudicem quæstionis,& Prætorem,& non prętorem,de crimine capitali cognouisse.Tertium genus iudicum quęstionis interdum fuisse,quorum ius cognoscendi non esset,sed tãtummodo sortiendi, quod locus de Q. Curtio proximus, iam ostendit, quem cognouisse de repetundis absurdum est credere, cum in ea causſa Prætorem quæsisse Glabrionem, ex Cicerone,& Pediano satis constet: itaq; tertium hoc genus quęsitores dici nõ poterant,duo illa superiora genera, qm̃ quidem quærerent, quęsitores & erant,& propriè dicebantur. Ex libro nostro de legibus Romanis.

thagoras quoque philosophus ortum habuit: necnon & vna ex Sibyllis, quæ inde Samia dicta est, quam ferunt de Christo prædixisse: Tu enim stulta Iudea Deum tuum non cognouisti, ludentem mortalium mentibus: sed & spinis coronasti: horridumque fel miscuisti. Fiebãt etiam in ea vasa fictilia egregiè ex creta efficta, quę Samia vocabantur. Altera sita est à regione Epiri, non procul a sinu Ambracio, quę & Cephalenia dicitur. De hac intelligendũ est illud Suetonij in Augusto, ab Actio, cum in Samum insulam se in hiberna recepisset. Est enim hęc insula breuissimo maris spacio ab Actio dirempta. Eodem spectat & illud Hom. Odyss. li. 15. Ἐν πολυμύλῳ γ' ἰθάκης Σάμοιό τε παιπαλοέσσης. Eadé & Same, (σάμη) aliquando appellatur, per primam nominum declinationem. Iã medio apparet fluctu Nemorosa Zacynthos, Dulichiumque, Sameque, & Neritos ardua saxis. Fuit & Samos, siue Same oppidi nomen in eadẽ insula, a Rom. diruptum. Strab. libr. 10. Quoniam cum insula sit terrapolis, id est, quattuor habeat vrbes, ex ijs vna est, quæ Samus, siue Same dicit, vtroque vsitato vocabulo, ipsi etiam insulę cõmuni. Et paulo post: De Cephalonia verò, quę est terrapolis, id est, ciuitates habet quaternas, neque huius temporis nomine dixit, neque vlla de ciuitate, vna tantum excepta Same, siue Samo, quod oppidum hodie deletum prorsus est. Plin. lib. 4. c. 12. Cephalenia quondam Melena dicta xi. m. pass. abest: circuitu patet xliiii. Same diruta a Romanis, adhuc tamen oppida tria habet. Ex his satis constat, vanam esse eorum differentiam, qui insulam Samon, vrbem verò Samen dicendam contendant. Ab hac Same deducitur gentile Samęus, σαμαῖος. cum a Samo Ionię insula Samius deducatur. Quorũ sentẽtię subscribit & Cœlius Rho. & Ruel. alijque nonnulli, eruditione non contẽnenda viri. Locus autẽ, cui primi sentẽtię huius auctores sunt innixi, est apud Col. lib. 12. c. 50. vbi sic habet; Cũ primum baccę variare cœperint, resolutis corticulis, emolliri debebũt, adiectis binis sextarijs integri salis in singulos modios: & aut tegulis, si cõsuetudo erit regionis, aut certè nouis fiscinis sampsę exprimi. Quo in loco Columellę, sampsas exprimere, idem esse putant, quod sampsas, hoc est, ossa ex oliuis premere, siue oliuas ossibus liberare. Quorum sententię quo minus subscribam, facit alter eiusdem Col. locus, qui est libro eod. c. 49. vbi sic legitur; Item si qui adhęserunt pediculi, adimunt foliaq. & futeli, quicumq. sunt intermisti, eximuntur. Postero die injicitur, quũ mundissimis molis suspensis, ne nucleus frangat. Et cum est in sampsam redacta, tunc sal coctus, tritusq. manu permisceatur cum cęteris aridis condimentis. Quo certè in loco sampsas nulla ratione pro oliuarum ossibus accipere possumus: Neque. n. vllo pacto fieri potest, vt oliua in nucleos suos redigatur. Quin ét is ipse locus, quo illi præcipuè nituntur, interpretationi, quam adducunt, prorsus reclamat, vt non magno negocio deprehendet, q̃ locum eum paulo pensiculatius examinarit. Quid autem ea voce significetur, non facilè fuerit pronunciare, præsertim cum præter vnum Columellam, quod quidem sciam, nemo ea fuerit vsus. Si tamen conjecturæ locus sit, quantum partim ex iam citatis Columellæ locis, partim ex varijs Catonis, Varronis, & Palladij locis colligere licuit, crediderim sampsas dici ipsas oliuarũ carnes, molla suspensa leuiter comminutas, & ossibus liberatas, quæ deinde exprimuntur, oleumque fundunt, aut aridis quibusdam herbis seminibusve conditæ in vsum cibarij, condimentive reponuntur.

SATYRA, ę, p. c. f. 1. [*Satyra,*] *σατύρα*. quasi fattura dici videtur, ob carminis varietatē, seu propter copiam rerū, quæ ibi tractātur. Est. n. Satyra carmen maledicum, & ad carpenda vitia compositū, quale scripserūt Luc. Hor. Iuu. Persius. Accepit & id carminis hunc ritulū, quod personis factisque fatiatum abundare videatur. Quidā a satyra lance, quæ referta multis, varijsq; primitijs in sacrificijs dijs offerebatur. Alij a lege satyra dictam existimant, quæ uno rogatu multa simul comprobat. De qua lege Sallustin Iug. Deinde quasi per satyram sententijs exquisitis in deditionem accipitur. Varro a quodā farciminis genere, quod multis rebus referciebatur, dictam satyram esse scribit. Vnde in secundo li. Plautinarum quæstionum habet, Satyra est vua passa, & poléta, & nuclei pineī ex musto conspersi. Sunt qui a Satyris deriuent, q̄ in hoc genere carminis res ridiculæ pudendæq; scribuntur, quemadmodū proferri a Satyris solēt. Don. in Ter. Deinde aliud genus fabulæ, id est, Satyra, sumpsit exordiū, quæ a Satyris, quos illotos semper, ac petulātes esse legimus, vocitata est. Potest etiam dici, Satyram ideo uocatā, quod in antiqua Satyra introducebātur Satyrorū personæ, aut si quæ erāt ridiculę, similes Satyris. Duo quippe Satyrarum genera fuisse constat: Alterum antiquius, quod sola carminum varietate cōstabat; Alterum recentius, apertam hominū reprehensionem continens, & acrē uitiorum obiurgationem. Hinc Satyricus, *σατυρικὸς*. quod ad Satyram pertinet; aut poeta ipse, qui Satyram scripsit.

SATYRA AVIS, f. 1. [*Coruo,*] a L. Floro pro coruo accipitur. Verba eius sunt hæc; Cū singulari certamine Manlius aureū torquē barbaro detraxisset, inde Torquati. Iterū in Pontino agro, cum in simili pugna L. Valerius infidēte galeę satyra alitę adiutus, Gallū vicisset, inde Coruini. Quo in loco illud quidē constat, Satyram auem pro coruo accipi; cur tamē ita dicatur, uideo a pleriſq; omnibus ignorari. quidā ad naturā eius auis id referunt, quod sola sit satyrorum more ad libidinē procliuior. Quin etiā Anaxagoras ore coire credidit, quod tamen negat Arist. Olim tamen vulgo ita persuasum fuisse satis cōstat ex hoc Martialis disticho: Coruc salutator, quare fellator haberis? In caput intrauit mētula nulla tuū. Verisimilius tamen est, Satyram auem dictam a loco, in quo res gesta est. Constat enim non modo Flori, verum etiā Liuij, & Gellij testimonio, singularem hanc Valerij cum Gallo pugnam in agro Pontino factam fuisse, quē agrum palus alluebat, quam Plin. Pontinam, Virgilius Saturæ, siue Satyræ paludē appellat. Satyra itaque auis dicta videtur, quasi auis Satyræ paludis. Coruos enim locis aquosis delectari, auctor est Theon, apud Aratum, propterea q̄ corpora eorum vehementius inaruerint. Vide Cœl. Rhod. lib. 19. c. 25.

SENATVS auctoritas, decretum, vel vim habet, vt S.C. vel infirmum
est, quæ vocatur Senatus auctoritas, quod quale vtrumque fuerit,
breuiter exponam. Cum Senatus legitimus, id est, quo loco, quo
die, quod numero, a quo magistratu oporteret, habitus, aliquid vel
de publica, vel de priuata re decreuerat, tum, si ex collegio Tribu
norum pl. nemo intercedebat, rata erat Senatus voluntas, & S.C.
dicebatur, eoq; nomine inscriptũ publicis tabulis consignabatur.
Sin aũt vel Senatus nõ legitimus aliquid decreuerat, vel Tribunus
pleb. intercesserat, ir firmum ac prorsus irritum decretum illud
erat, nec Senatus cõsultum. sed Senatus auctoritas vocabatur, pro-
pterea quod auctoritatẽ quãdã publicis tabulis testata senatus vo-
luntas haberi videbatur, quia de re testis Liu. est libr. IV. Si quis, in-
quit, intercedebat, Senatus auctoritate se fore cõtentũ. Nec obscu-
rè Dio lib. XLI. Nam cum Q. Cassius Lõginus, & M. Antonius, Tri
buni pleb. intercederẽt, quo minùs fieret S.C. de Cæsare ex Gallia
reuocando, cumque Senatus Pompeio deditus, a Cæsare alienus;
propterea vestem, vt in aduersa tristique re mutasset, tamen ne sic
quidem factum esse Senatusconsul. sed perscriptam sententiam es
se, Dio significat. Idemque paulo apertius li. XLII. Senatusconsul. in-
tercederent Tribuni pl. Senatus tamen auctoritas perscripta est.
Planissimè autem libr. IV. his ferè verbis; Si quando aliquid Sena-
tus decreuisset, nec legitimus Senatorum numerus affuisset, non
inerat in eo ius S.C. sed auctoritas senatus dicebatur, qua tantùm
constaret eorum, qui tunc affuissent, voluntas, & sententia. Obser-
uatum idem est, cum vel senatus alieno loco, aut tempore, aut non
legitimo edicto habitus esset, vel Trib. pleb. intercessissent, impe-
dito. n. S.C. extare tamen Senatus voluit sententiam suam. Accedit
Cicer. testimonium in epist. 7. cum ait: S.C. nullum extat, quo tedu
ctio Regis Alexandrini tibi adempta sit, eaq; quæ de ea scripta est
auctoritas, cui scis intercessum esse, vt ne quis omnino Regem re-
ducerent, tantam vim habet, vt magis iratorum hominum studii,
quàm constantis Senatus consilium esse uideatur. Et ibidem paulo
post: Offensionem esse periculosam, propter interpositam aucto-
ritatem, religionemque uideo. Et epist. 11. libr. 5 ad Att. Nondum
satis erat allatũ, quomodo Cæsar ferret de auctoritate perscripta.
Loquitur enim ibi Cicer. de S.C. ab intercedẽtibus Tribunis pleb.
Cassio, & Antonio, qui Cæsari fauebant, impedito, quod ex Dio-
nis etiam li. XLI. odendimus. Nec dubito, quin de auctoritate per-
scripta, cum Senatus decreto intercessum esset, Cicer. significet li-
bro 3, de leg. in eo loco; Senatus decreta rata si ne potestas par,
maiorve prohibessit, perscripta seruanto. Quæ licet exempla si-
nis hunc morem ostendãt, tamen vt dubitatio prorsus tollatur om
nis, ascribemus verba S.C. quod Cœlius Ciceroni misit inclusum
epist. 10. libro VIII. Si quis huic S.C. intercesserit, Senatui placere
auctoritatem perscribi, & de ea re ad Senatum, populumque re-
ferri. Et in alio eiusdem Senatusconsulti capite: Si quis huic Sena-
tusconsulto intercessisset, auctoritas perscriberetur. Huic opinioni

locus Ciceronis in oratione pro Deiotaro videtur aduersari: Cum audisset Deiotarus, inquit, Senatus consentientis auctoritate arma sumpta, Consulibus, Prætoribus, Tribunis pleb. nobis Imperatoribus Rempu. defendendam datam. Senatus auctoritatem vocat in ea re, de qua Senatusconsultum esse factum Cæsar obtendit lib. 1. de bel. Ciu. his verbis; Decurritur ad illud extremum, atque vltimum Senatusconsultum, quo nisi penè in ipso Vrbis incendio, atque desperatione omnium salutis, descensum est; dent operam Consules, Prætores, Tribuni pleb. quippe pro Consulibus sunt ad vrbem, ne quid Resp. detrimenti capiat: hæc Senatusconsulta perscribuntur ad VII. Id. Ian. Hoc argumentum duplici ratione refellitur, vel quod cum Senatusconsultum illud contra Cæsarem belli ciuilis initio factũ esset, nec Tribunis pleb. pro Cæsare ad intercedendum paratis, locus esset, non audet Cicero ad Cæsarem, iam omnia tenentem, pro Deiotaro reo suppliciter agens, S. C. appellare, præsertim cũ sciat, si Tribunis pleb. Antonio, & Cassio intercedere licuisset, quod Pompeianorum factione non licuit, S.C. esse non potuisse: itaque sapienter tempori, cautsæque seruiens, odiosum Cæsari nomen Cicero vitauit, a quo salutem Diotari Regis impetrare cupiebat. Altera est ratio, mihi quidem valde probata, quod Senatus auctoritas non semper decretum illud significat, a quo S.C. & vis, & nomen abest, sed tantũ vbi simul intercessionis mentio fit, quæ significat S.C. esse non posse, vbi vero nulla intercessionis adiuncta mentio est, tunc senatus auctoritas pro ipso accipitur S. C. vt in oratione ad Pisonem; Quam prouinciã P. Lentulus, cum & senatus auctoritate, & sorte haberet, depositurus esset, significat enim a Lẽtulo depositam Ptolomæi Regis reductionẽ, quam in S.C. esse mandatam ostendimus in argumento epist. 1. Et in ea pro domo; Ex Senatus auctoritate, & Senatum, & omnes bonos mutata veste vidi. Senatus auctoritatem appellat, cum tamen S.C. de mutanda veste factũ esset, quod in oratione pro Sestio legimus. In Vatinium etiam; Ne hoc quidem, inquit, Senatui relinquebas, vt legati ex eius ordinis auctoritate legerentur. Quis non intelligit? Ex eius ordinis auctoritate, pro, ex S. C. dictum esse, cũ paulo post sequatur; Quis legatos vnquam audiuit sine S.C. ante te nemo. Satis exemplorũ hoc de genere vnus Cicero suppeditat, quæ legentibus occurrent. Ergo Senatus consentientis auctoritate arma sumpta, idem valet, quod vniuerso approbante Senatu, decreto Senatus vniuersi. Ex nostro comment. in Cic. epist. fam.

Aut ἀπὸ τῶν σειρῶν, quod catenam, vel vinculum significat: propterea quod ad venas incautos amore sui, velut vinculo quodam iniecto, retinebant. Fuerunt qui & aues quasdam in India esse tradiderint, Sirenas appellatas, cantu homines mulcentes, vt deinde somno grauatos lacerarent. Vide Pl. li. 10. c. 49. Sunt & Sirenes in fucorum genere, quas in apibus Nymphas appellamus; hoc est, fuci imperfecti, cum iam formam capere incipiunt. Plin. lib. 11. c. 16.

SIRIASIS, f. 3. σιρίασις. inflammatio est partium earum, quę circa cerebrum, aut eius membranas sunt, ἀπὸ τοῦ σιριᾶν, quod est capitis inflammatione laborare. Plin. lib. 30. c. 10. Adustio infantium, quæ vocatur siriasis. Idem lib. 22. cap. 21.

SIRIVS, in. 2. σείριος. stella est in ore Canis, quę a Latinis Canicula dicitur. Higinus tamen in tractatu de signis cælestibus, Siriũ diuersum facit a Canicula, neque in ore Canis, sed in capite eius collocat. Hęc in cæli centro cum sole coniuncta æstum eius duplicat, mortaliumq; corpora nimio calore languida reddit. Dictus Sirius, vt quidam volunt, ἀπὸ τοῦ σειραίνειν, hoc est, a siccando, propterea q, & fluuios & fontes nimio calore exsiccet: vel vt alij ἀπὸ τοῦ σειρᾶν, hoc est, ab euacuãdo, quod corpora nostra sudorib. euacuet. Luca. li. 10. Rapidus qua sirius ignes Exerit. Stat. lib. 1. Siluar. Nec calido latrant Sirius astro. Seruius enarrans illud Virgil. 10. Aen. Hinc est, quod cum tempore certo oriatur, non semper est noxia. Ad hanc stellam Sol mẽse Iulio veniens duplicat æstus, & prę nimio calore languent mortalia corpora. Quin & solem ipsum quidam Sirium, & astra omnia Siria appellarunt, vt annotauit Suidas. Est item Sirius, eodem Suida teste, arcuculi genus prætenue, & leuiter contextum.

Hierem Romanam magno turbãte tumultu Sistet eques. Huius verbi præteritum est Stiti, non, vt quidam existimarunt, steti; supinum autem nullum habet, nam statum a sto, non a sisto deducitur. Vnde & Stator Iupiter, a stãdo, non a sistendo cognominatus est. Priscianus præteritum huius verbi statui esse existimauit, qđ certe a verbo statuo esse constat, quemadmodum & supinũ statutum. Stiti autem verum verbi huius præteritum esse, in noctib. suis Atticis docet Gellius, cuius hæc sunt verba; In libro vetere M. Catonis, qui inscribitur, contra Tiberium exulem, scriptum siquidem sic erat, Quid si vadimoniũ capite obuoluto stetisses? recte ille stetisses scripsit, sed falsi, & audaces emẽdatores exscriptos p libros stetisses fecerunt, tanquam stetisses vanum, & nihili verbũ etiã. Quin potius ipsi nequam, & nihili sunt, qui ignorant stitisse dictum a Catone, quoniam sisteretur vadimonium, nõ staretur. Quibus ex Gellij verbis, cum satis constet, stiti, a sisto præteritum esse, non steti, illud quoque obscurum esse non potest, supinum stitum esse, non statum, statorisque appellationem non a sistendo, sed a stando, esse deductam. Duplex hic lapsus Calepini. Primus, cum scribit supinum verbi sisto esse stitum, non autem statum. Alter vero quum Iouem non a sistendo, sed a stando, Statorem cognominatum esse tradit. Quod ad primum attinet, diserte refellitur verbis Vlpiani in lib. 3. si quis in ius voc. ita loquentis; Si quis iudicio sisti promiserit, neque adiecerit pœnam, si statum non esset. Quo in loco statum dicitur, non stitum. Cæterum statoris appellationẽ esse deductam a stando probat Liu. lib. 1. ab vrbe, vbi sic habet: At pater Deum deme terrorem Romanis, fugamq. fedam siste; Hic tibi templum Ioui Statori voueo, &c. SOLON, m.3. [*Solone.*] σόλων. fuit vnus ex ſeptem ſapientibus Græciæ: patria Salaminius, qui (teſte Gel. li. 17. c. 21.) Athenis claruit, Tarquinio Priſco Romæ regnante. Hic Atheniẽſibus leges dedit, tãto tẽperamento cõpoſitas, vt parem gratiam a Senatu & plebe contraheret, quãquam plebs & Senatus in ſummo prius eſſent diſſenſione. Draconis autẽ leges, *iijs* exceptis, quæ in homicidas pœnas ſtatuebãt, quod iuſto atrociores videtẽtur, omnes abrogauit: illis. n. in oĩa ſcelera æqualis pœna ſtatuta erat, adeo vt etiam ij, qui otij damnati eſſent, aut qui olera ſurripuiſſent, capite plecterentur: ob quam cauſſam Demades dicere ſolebat, Draconem nõ atramẽto, ſed ſanguine leges ſcripſiſſe. Florebat tũc in Republica Piſiſtratus, æmulus Solonis, cui & genere propinquus erat. Illius igit eloquẽtia plus potuit apud populũ, quam huius ſapientia. Ceſſit ſponte Solon tyrãnum fugiens, primum in Aegyptũ, deinde in Cyprum, poſtremo ad Creſum regem: cuius cũ opes videret, oſtentãti Creſo, atque interroganti, num quis ſe felicior eſſet? reſpondit, Tellũ quẽdam pauperem admodum, alioqui iuſtum, Athenis agentem, qui in ſuo prædiolo ſolitarius cõſenuerat: ſimul affirmans nihil eſſe felix, quod temporum mutationi ſubiacet, felicitatem tantum finem indicare. Cuius ſententiæ Creſus poſtea a Cyro captus, meminiſſe dicitur. Solon inde in Ciliciã profectus, ciuitatem a ſuo nomine Solos dixit, in qua Atheniẽſes colonos ſtatuit, qui interuallo temporis ab Attica lingua deficientes, ſoloeciſſare dicti ſunt; vnde verbum ſoloeciſmi tractum. Deceſſit in Cypro annorũ LXXX. mandauitque oſſa Salaminem tranſferri, ibique per regionem proijci ac diſſipari, ne Athenas inferrentur, quoniam diſcedens iureiurãdo ciues adegerat, non antiquaturos leges ſuas donec rediret. P. M. Status, ex quibus omne genus controuersiarum de agris exoritur, octo omnino sunt, infectiuus, expositiuus, subiectiuus, recuperatiuus, assumptiuus, initialis, materialis, effectiuus. Iniectiuus ergo status est gnalis: nã siue de possessione, siue de fine cõtrouersia nascatur, per hoc repetitio iusta, iniustaq; eliciur. Expositiuus est status controuersiæ, quoties finitimorum argumentorũ caret demonstratione, & partium magis exigit narrationem, per quam exponendum sit, quo sint genere determinandę, aut persuadendum iudici, etiam si loci natura finitimã exhibeat similitudinẽ. Subiectiuus status est, cum relinquitur status generalis, & alio quolibet statu cõtrouersia defenditur. Recuperatiuus est status, quoties nõ a trifinio, aut quatrifinio, sed ex quolibet finis loco incipientis termini recturam dirigit, & per incessum definitionis loca quædam alteri fundo acquirit, aut solũ aufert, & eius loco redditur. Assumptiuus primę cõtrouersiæ status, qui est depositione terminorum, in rigorem, aut in finem transcendit. Initialis controuersię status, de rigore pertinens ad materiam, transcendit in controuersiam, q̃ est loco tertio de fine status materialis, non conditionẽ mutat, neque
